LinkedIn: <https://www.linkedin.com/in/tony-wangolo-545b23285/>

Junior Full Stack Developer specializing in backend development with Python, Django, REST APIs, PostgreSQL, and modern JavaScript frameworks. Experienced in building and deploying practical web applications including management systems, marketplaces, and digital platforms. Skilled in database design, authentication systems, role-based access control, and cloud deployment workflows. Passionate about creating reliable software solutions that solve real-world problems.

CORE PRODUCTION PROJECTS

SchoolSys | School Management & Operations Platform

Technical Stack: Python | Django | PostgreSQL | Render | Tailwind CSS

Built a full-stack school management platform for handling administrative workflows including student records, attendance tracking, fee management, and library operations. Designed Django-based backend systems with role-based access control for different user groups and developed responsive dashboards using Tailwind CSS. Deployed the application using cloud hosting services.

Ustawi | Smart Rental & Property Platform

Technical Stack: Python | Django REST Framework | Next.js | PostgreSQL | Vercel | Neon

Developed a full-stack rental platform connecting tenants and property managers. Built backend APIs using Django REST Framework and designed database models for managing users, properties, and rental-related data. Implemented authentication, frontend interfaces, and cloud deployment using modern web technologies.

PROFESSIONAL EXPERIENCE

January 2026 | Present | Nairobi, Kenya

ICT Lead (Volunteer) | ODM Comrades Chapter

- Led frontend development for a university digital registration platform built using PHP and Laravel. Designed responsive interfaces, registration workflows, and dashboard components used for managing student records across multiple campuses. Collaborated with other contributors to improve data collection processes and streamline digital registration operations, supporting registration of over 800 students.

January 2024 | Present

Freelance Developer | Remote

- Built and deployed full-stack web applications using Python, Django, Flask, Streamlit, and MySQL. Developed backend APIs, authentication systems, database structures, and responsive user interfaces for different client and personal projects. Worked across the software development lifecycle including planning, development, testing, deployment, and maintenance.

January 2025 | June 2026 | Nairobi, Kenya

Volunteer Computer Skills Trainer | LEA Organization

- Trained over 50 community members in digital literacy, Git/GitHub, programming fundamentals, and web development concepts. Conducted practical sessions covering computer skills, development workflows, and basic software engineering practices.

EDUCATION

TECHNICAL SKILLS

Languages

Python | JavaScript | TypeScript | SQL | PHP | HTML/CSS

Frameworks & Libraries

Django | Django REST Framework | React | Next.js | Flask | Laravel | Tailwind CSS | Streamlit

Databases

PostgreSQL | MySQL | Supabase

Tools & Deployment

Git | GitHub Actions | Docker | Linux | Render | Vercel

Core Competencies

REST API Development | Database Design | Authentication & Authorization | Role-Based Access Control | Full Stack Development

Expected Graduation | 2027

Bachelor of Technology | Communications and Computer Networks

Technical University of Kenya

Completed

Professional Backend Web Development Certification

ALX Africa
